ComforTechLE[™]
 Performance Seating Low Emission Foams

ComforTechLE[™], moulded foam developed by The Woodbridge Group[®], is an exciting low emission breakthrough. This product development directly responds to increased interest among the world's automotive manufacturers for low emission interior components. This environmental product complements the popular family of **ComforTech**[™], high performance seating foams.

The tested emissions of **ComforTechLE**[™] have a measured VOC reduction of more than 50% without compromising foam comfort or durability performance. The **ComforTechLE**[™] family of high performance seating urethane foams, is the industry's first Low Emission solution, to meet all performance requirements.

ComforTechLE[™] is another
 GreenLite Innovation

GreenLite[™]
 Low Mass Environmental Automotive Technologies

GreenLite Innovations by The Woodbridge Group include a growing menu of high performance, low mass automotive foam solutions, to help improve fuel efficiency and reduce CO₂ emissions.

More, Better, Faster[™]
