

INNOVATION ADVANTAGES

- Improved vibration management capabilities
- Manage the foams vibration transmissivity away from human sensitivity
- Lowers peak at resonance and lowers attenuation
- Offers optimal dynamic seat performance experience

VibControl[™]

Vibration Management Foams

VibControl[™] Vibration Management Foams, now offer automotive seat designers, better control of the polyurethane cushion's vibrational response, to offer excellent dynamic comfort properties.

Through many years of advanced chemical formulating experience, Woodbridge has developed **VibControl[™]** foams. This technology provides excellent vibration transmissivity performance, by moving the foam's vibration response away from human sensitivity and the vehicle's harmonics.

More, Better, Faster[™]
