

## INNOVATION ADVANTAGES

- Improved noise control capabilities - to help customers meet a more targeted vehicle sound profile
- Fine-tune material properties and performance - for foams, films, laminates and composites
- Lightweight, low cost, acoustical polyurethane - can be fabricated through mechanically cut sheets, or molded to surround complex geometries
- Tested and certified - to meet the industry's highest flammability specification, UL94V-0

## WhisperTech<sup>™</sup>

Acoustical Foam Technologies

**WhisperTech<sup>™</sup> Acoustical Foam Technologies** continue to enhance the driving experience by striving to further reduce noise, vibration and harshness (NVH). **WhisperTech<sup>™</sup> sound management engine compartment products**, deliver a more targeted vehicle sound profile and now offer V-0 capability, the industry's highest plastics flammability standard.

**WhisperTech<sup>™</sup> products** deliver comprehensive sound management strategies, by controlling material properties, cell structures and composite synergies. These custom engineered solutions, offer the ideal combination of sound absorption, damping and dissipation.

**WhisperTech<sup>™</sup> products** are made from lightweight, low cost, acoustical polyurethane, and can be fabricated through mechanically cut sheets, or molded to surround complex geometries.

**WhisperTech<sup>™</sup>** is another  
GreenLite Innovation

**GreenLite<sup>™</sup>**

Low Mass Environmental Automotive Technologies

GreenLite Innovations by The Woodbridge Group include a growing menu of high performance, low mass automotive foam solutions, to help improve fuel efficiency and reduce CO<sub>2</sub> emissions.

**More, Better, Faster<sup>™</sup>**
