

INNOVATION ADVANTAGES

- Provides a Superior Finished Trim Appearance
- Lower Cost Solutions to Secondary Counter measures
- Repeatable performance
- Increases Trim Design Flexibility
- Improves Environmental Performance

TrimVisible[™]

Visual Performance For Trim Apertures

The **TrimVisible[™]** family of foam products are designed to improve the appearance of a trimmed seat assembly, by providing a visual transition between any exposed seating components. This innovative neutral color foam solution integrates several new benefits, while providing the same high quality seat cushioning performance.

TrimVisible[™] foam provides a significant reduction in the contrast between the foam, trim and other exposed components, by making the entire area recede into shadow.

TrimVisible[™] foam is an inherent and permanent solution, that eliminates the need for costly traditional methods of improving the appearance of trim apertures.

TrimVisible[™] foam is an engineered solution providing universal trim design latitude, and more robust visual performance for trim cover apertures, by diminishing the limitations of standard close-out methods and increasing customer satisfaction.

TrimVisible[™] foam reduces VOC's by 10% and offers a key chemical platform improvement, for future Low Odor and Low Emissions products.

TrimVisible[™] is another
GreenLite Innovation

GreenLite[™]
Low Mass Environmental Automotive Technologies

GreenLite Innovations by The Woodbridge Group include a growing menu of high performance, low mass automotive foam solutions, to help improve fuel efficiency and reduce CO₂ emissions.

More, Better, Faster[™]
