

## INNOVATION ADVANTAGES

- Extremely low VOC emissions
- Compliant with the most severe customer VOC specifications
- Maintains all physical performance ensuring foam comfort and durability
- Mitigates odour and fogging within vehicle
- Manufactured without the use of prohibited chemical constituents
- Excellent processing characteristics offering a high degree of design flexibility, combined with a wide load bearing and hardness range, at densities as low as 35 kg/m<sup>3</sup> without compromising foam performance

## TrimVisible LE<sup>™</sup>

Visual Performance Low Emission Foams

In response to marketplace requests for lower volatile organic compound (VOC) emission levels for automotive interior components, **The Woodbridge Group**<sup>®</sup> has announced **TrimVisible LE<sup>™</sup>** low emission molded foam technology, to meet the most stringent VOC specifications.

**TrimVisible LE<sup>™</sup>** foams can reduce VOC levels more than 80% for some compounds, while maintaining comfort and durability, as well as all other product requirements.

**TrimVisible LE<sup>™</sup>** foams provides best-in-class VOC performance, while its neutral color improves the appearance of apertures in the trimmed seat assembly.

**TrimVisible LE<sup>™</sup>** is another  
GreenLite Innovation

**GreenLite<sup>™</sup>**

Low Mass Environmental Automotive Technologies

GreenLite Innovations by The Woodbridge Group include a growing menu of high performance, low mass automotive foam solutions, to help improve fuel efficiency and reduce CO<sub>2</sub> emissions.

**More, Better, Faster<sup>™</sup>**
